In a sheet-affixing device for affixing a pressure sensitive adhesive sheet onto a wheel, the prior art does not teach or make obvious the concept of a pressing member that is used for pressing a peripheral part of the pressure sensitive adhesive sheet, suctioned to the bottom surface, against the rim in order to affix the peripheral part to the rim and which is movable relative to the absorption plate member along the axial direction of the ring-shaped absorption plate member in the manner claimed by the applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
